Assessment Report

Project GoCD Rails 2

Date Dec 7, 2019

Generated by gcrowl

Executive Summary

Project: GoCD Rails 2

Tools: rubocop

244 Unspecified	**244** **Total Findings** (from 22 rules)

Finding Status

New	Unresolved	Escalated	Ignored	False Positive	Fixed	Mitigated	Assigned
244	0	0	0	0	0	0	0

Finding Details

UnusedBlockArgument (unspecified severity)

No Common Weakness Enumeration information available

Finding Details (76)

Path: rails/spec/controllers (16)

Location: rails/spec/controllers/comparison_controller_view_spec.rb:173
ID: 30121 **Status:** New **Detection Method:** Static Analysis
First Seen: Dec 7, 2019 8:55 PM **Last Modified:** Dec 7, 2019 8:55 PM
Reported by rubocop: rubocop / Lint / UnusedBlockArgument
Location: rails/spec/controllers/comparison_controller_view_spec.rb

> Unused block argument - `name`. If it's necessary, use `_` or `_name` as an argument name to indicate that it won't be used.

Reported by rubocop: rubocop / Lint / UnusedBlockArgument
Location: rails/spec/controllers/comparison_controller_view_spec.rb

> Unused block argument - `from`. If it's necessary, use `_` or `_from` as an argument name to indicate that it won't be used.

Reported by rubocop: rubocop / Lint / UnusedBlockArgument
Location: rails/spec/controllers/comparison_controller_view_spec.rb

> Unused block argument - `to`. If it's necessary, use `_` or `_to` as an argument name to indicate that it won't be used.

Reported by rubocop: rubocop / Lint / UnusedBlockArgument
Location: rails/spec/controllers/comparison_controller_view_spec.rb

> Unused block argument - `loser`. If it's necessary, use `_` or `_loser` as an argument name to indicate that it won't be used.

Code Snippet:

```
170       result = HttpLocalizedOperationResult.new
171       allow(HttpLocalizedOperationResult).to receive(:new).and_return(result)
172
173       expect(changeset_service).to receive(:revisionsBetween).with('some_pipeline',
      10, 17, loser, an_instance_of(HttpLocalizedOperationResult), false) do |name, from,
      to, loser, result|
174         result.notFound("pipleine '[\"some_pipeline\"]' not found.",
      HealthStateType.general(HealthStateScope.forPipeline('foo')))
175       end
176
```

Location: rails/spec/controllers/environments_controller_spec.rb:85
ID: 30297 **Status:** New **Detection Method:** Static Analysis
First Seen: Dec 7, 2019 8:55 PM **Last Modified:** Dec 7, 2019 8:55 PM
Reported by rubocop: rubocop / Lint / UnusedBlockArgument
Location: rails/spec/controllers/environments_controller_spec.rb

> Unused block argument - `user`. If it's necessary, use `_` or `_user` as an argument name to indicate that it won't be used.

Code Snippet:

```
82        expect(@environment_config_service).to receive(:getAllLocal
   PipelinesForUser).with(@user).and_return([EnvironmentPipelineModel.new("foo", nil),
    EnvironmentPipelineModel.new("bar", nil)])
83        expect(@environment_config_service).to receive(:getAllRemot
   ePipelinesForUserInEnvironment).with(anything, anything).and_return([])
84
85        expect(@environment_config_service).to receive(:createEnvironment) do |
   environment_config, user, operation_result|
86          @env_name = environment_config.name()
87          @environment_variables = environment_config.getVariables().map do |evc|
88            {"name" => evc.name(), "value" => evc.getValue()}
```

Location: rails/spec/controllers/environments_controller_spec.rb:111
ID: 30301   **Status:** New   **Detection Method:** Static Analysis
First Seen: Dec 7, 2019 8:55 PM   **Last Modified:** Dec 7, 2019 8:55 PM
Reported by rubocop: rubocop / Lint / UnusedBlockArgument
Location: rails/spec/controllers/environments_controller_spec.rb

Unused block argument - `result`. If it's necessary, use `_` or `_result` as an argument name to indicate that it won't
be used.

Code Snippet:
```
108        expect(@environment_config_service).to receive(:getAllLocal
   PipelinesForUser).with(@user).and_return([EnvironmentPipelineModel.new("foo", nil),
    EnvironmentPipelineModel.new("bar", nil)])
109        expect(@environment_config_service).to receive(:getAllRemot
   ePipelinesForUserInEnvironment).with(anything, anything).and_return([])
110        allow(@agent_service).to receive(:getRegisteredAgentsViewModel).a
   nd_return(AgentsViewModel.new)
111        expect(@environment_config_service).to receive(:createEnvironment) do |
   env_config, user, result|
112          expect(env_config.name()).to eq(CaseInsensitiveString.new(environment_name))
113          expect(env_config.getPipelineNames().to_a).to eq([CaseInsensitiveS
   tring.new("first_pipeline"), CaseInsensitiveString.new("second_pipeline")])
114          expect(env_config.getAgents().map(&:getUuid)).to eq(["agent_1_uuid"])
```

Reported by rubocop: rubocop / Lint / UnderscorePrefixedVariableName
Location: rails/spec/support/util/test_controller.rb

Do not use prefix `_` for a variable that is used.

Code Snippet:
```
17 unless defined? NonApiController
18   def draw_test_controller_route
19     begin
20       _routes = Go::Application.routes
21       _routes.disable_clear_and_finalize = true
22       _routes.clear!
23       Go::Application.routes_reloader.paths.each{ |path| load(path) }
```

ImplicitStringConcatenation (unspecified severity)

No Common Weakness Enumeration information available

Finding Details (1)

Path: rails/spec/views/stages (1)

Location: rails/spec/views/stages/_jobs_html_spec.rb:28
ID: 30189   **Status:** New   **Detection Method:** Static Analysis
First Seen: Dec 7, 2019 8:55 PM   **Last Modified:** Dec 7, 2019 8:55 PM

Reported by rubocop: rubocop / Lint / ImplicitStringConcatenation
Location: rails/spec/views/stages/_jobs_html_spec.rb

Combine "bar_stage" and "2" into a single string literal, rather than using implicit string concatenation. Or, if they were intended to be separate method arguments, separate them with a comma.

Code Snippet:

```
25
26    before :each do
27      stage = StageMother.completedStageInstanceWithTwoPlans("bar_stage")
28      stage.setIdentifier(StageIdentifier.new("foo_pipeline", 10, "label-10",
    "bar_stage" "2"))
29      stage.calculateResult()
30
31      @stage = StageSummaryModel.new(stage, nil, nil, nil)
```
